

## DELTA TRAP PHEROMONE HOLDER · Traps

### Description

Made of high-strength plastic, they are designed to place the baits inside the Delta traps, preventing it from coming into contact with the sticky base. It has two holes of different diameters so any bait available on the market can be used.

### Características

- › Material: High- strength plastic
- › Size: 9.5 x 2.5 cm. Diameter of the holes: 0.5 and 0.7 cm

### Usage

Place the bait (rubber septa) in the corresponding hole. Hang the pheromone device inside the trap using the trap wire.
